Program Objectives

The Pediatric Acute and Critical Care Conference will feature lectures, case presentations and educational sessions on a variety of acute and critical care issues facing health care professionals today. This one-day conference will focus on current trends in Acute and Critical Care Pediatric medicine. The program is designed for pediatricians, primary care physicians, nurses and allied health professionals involved in the care for children.

No prerequisites are required.

At the conclusion of this program participants should be able to:

- Review the signs and symptoms of toxin ingestion and potential complications.
- Review Diabetic Ketoacidosis, presenting symptoms, potential complications and general management.
- Discuss Picoronavirus, its presenting symptoms, and its effect on the pediatric population.
- Discuss Facial trauma- initial management and prevention of complications.
- Review the management of pediatric bronchiolitis.
- Discuss the management of pediatric myocarditis.
- Demonstrate the proper techniques, care and management of artificial airways

Accreditation
