26th Annual West Virginia Vascular/Endovascular Surgery Symposium

Offered at the Greenbrier Resort, White Sulphur Springs, WV

Saturday and Sunday, Oct. 22-23, 2016

Program Overview and Objectives

The world renowned faculty of this conference will present an update on vascular/endovascular topics. This program is designed for general surgeons, vascular surgeons, interventional vascular radiologists, cardiologists, neurologists, internists, family practitioners, nurses and allied health professionals interested in the diagnosis and treatment of patients with vascular disease as well as the management of common vascular disorders. No prerequisites are required. The latest concepts, methodologies and techniques in the surgical and percutaneous management of patients with vascular disease will be explored through presentations and panel discussions. After completing this course, participants should be able to:

- Review the work up for carotid bruit
- Examine preoperative management of anticoagulant and antiplatelet therapy prior to vascular intervention
- Review the treatment of lower extremity claudication
- Discuss the treatment and AAA and when to treat
- Discuss cost and hospital reimbursement for CEA AND CAS
- Review and debate the current carotid guidelines and the use of carotid stenting in the future
- Examine the impact of contralateral carotid occlusion on CEA and CAS
- Review timing for CEA after acute stroke
- Discuss imaging aortic dissections, chronic aortic dissections and the use of endovascular therapy
- Examine the hospital economics of EVAR
- Discuss aortic endograft infections, their causes and prevention
- Review the endovascular management of abdominal aortic aneurysms and femoral artery aneurysms
- Review the role of bypass surgery of the lower extremity and peripheral vascular disease in 2016
- Examine distal revascularizations and current lessons learned
- Discuss current treatment strategies for care of renal artery aneurysm and the diabetic foot.
- Examine the role of performance accountability in the preoperative optimization of geriatric lower extremity bypass
- Review current acute interventions for deep vein thrombosis
- Examine the use of IVC thrombectomy for advanced renal cell carcinoma
- Examine duplex guidance for foam sclerotherapy.
- Discuss EVAR explants indications and outcomes
- Examine transcatheter management of patients with upper/ lower GI bleeding
- Review the pros and cons of office based vascular procedures

A panel discussion on challenging cases will end the session on Sunday. The Vascular Group of the Virginias will be meeting on Sunday for their annual research meeting.

Participation is encouraged. Nationally and internationally-known speakers will serve as faculty.
